Two complementary models for one complete solution

AIRTRAQ AVANT

Reusable Optics + Disposable Blades

Minimum cost per intubation.
VL for frequent use.

AIRTRAQ SP

Fully Disposable

One piece. Ready to use.
VL for remote locations
and emergencies.

1. Slide midline around the tongue

2. Center vocal cords

3. Push ETT

4. Remove midline

- * Keep Midline
- * Do not insert too deep

- * Lift gently
- * Twist Airtraq to center vocal cords
- * Corkscrew ETT if needed

Airtraq improves routine intubations and it is specially effective for:

- ➡ Cervical immobilization
- ➡ Obese
- ➡ Awake
- ➡ In combination with a fiberscope
- ➡ Frontal or lateral intubations
- ➡ Poor dentition

How Airtraq simplifies Video Intubation

- Airtraq's channel simplifies ETT insertion reducing intubation time.
- No stylet needed. Avoids potential injuries. Eliminates stylet costs.
- 90° shape minimizes hyperextension and reduces force required.
- Reduces hemodynamic reactivity.
- Facilitates intubation from any position (face to face, etc.).
- High intubation success rate in difficult airways.
- Easier to learn than other video laryngoscopes.

**Multiple
viewing
options**

**90° channel
simplifies
intubation**

**Minimum capital
investment
allows availability
in every location**
