Form and Instructions for recipients of Water and wastewater project appropriations in the FY 2022 Budget Bill (S.L. 2022-74) of the General Assembly of North Carolina, Sections 12.9 (e)

(Last updated: July 25, 2022)

The following instructions are for Local Government Units receiving NC General Assembly 2022 Budget appropriations through the Department of Environmental Quality (DEQ) for water and/or wastewater projects as approved in Session Law 2022-74 of the General Assembly on North Carolina. The NC DEQ/Division of Water Infrastructure (Division) will be administering the funds.

Appendix A provides a list of recipients and appropriated fund amounts as specified in Section 12.9.(e). All Local Government Units in the list must use this form. The Division pays out these grant funds to the local government unit (the Recipient) on a reimbursement basis after the recipient awards a division-approved construction contract. Recipients must use the funds in accordance with all applicable federal law and guidance, as well as NC State statutes.

Once a completed form has been received and the project scope appears eligible for funding (see discussion below), the Division will issue a "Letter of Intent to Fund", which will establish milestone dates for the following:

- If applicable depending on the proposed project scope of work and other sources of funding: Recipient submits an Engineering Report and Environmental Information Document (ER-EID),
- Division approves the ER-EID (if required),
- Recipient submits the project's Bid and Design package (plans and specifications and associated documents),
- Division approves the Bid and Design package,
- Recipient advertises project, receives bids, submits bid information, <u>and</u> receives authority to award,
- Recipient executes construction contract(s), and
- Recipient receives last reimbursement.

Projects Eligible for the Appropriated Funds

Federal guidance and state statutes limit the types of projects that are eligible for the appropriated funds. <u>Drinking Water Reserve and the Wastewater Reserves</u> are limited to Infrastructure construction projects for public water systems and wastewater systems. The budget also includes additional eligibility requirements for specific projects or communities.

Additional requirements:

Funding for these projects will be from Federal funds provided through the American Rescue Plan Act and State appropriations. All projects will be required to meet ARPA federal requirements and all applicable requirements of GS. 159G. ARPA criteria include:

- Projects must be the type that would be eligible for funding under the <u>Drinking Water State Revolving</u> Fund Program or the Clean Water State Revolving Fund Program.
- Funds must be obligated by December 31, 2024.
- Funds must be fully spent (i.e., fully reimbursed to the recipient) by December 31, 2026.
- Funds cannot be used to pay for existing debt or used as a match for other federal funding.
- Projects receiving ten million dollars or more in ARP funding must comply with Davis-Bacon wage requirements.
- If project funding is co-mingled with other federal funds, all requirements for the other federal funding program(s) will apply to the ARP funds.

Section 1 – General Information

This section contains information the Division will need to process your appropriation. Complete each blank as directed below.

- **Recipient Name** Provide the official name of your local government unit (LGU) (e.g., Town of Anytown, Bixby Sanitary District).
- **County** List the county in which your LGU resides.
- **UEI Number** Use <u>www.sam.gov</u> to find your UEI number. Make sure your IEI number is up to date.
- Federal Tax ID # Needed for grant disbursement purposes
- PWSID # Needed for all drinking water projects
- **Project Name** Enter a project name that is short yet captures the nature of your project.
- **Funding Amount Requested** Enter the amount of funding you are requesting. Must be no more than the amount appropriated in S.L. 2021-180 (see Appendix A for appropriated amount).
- **Total Project Cost** Please enter the cost of <u>the entire project</u>. Note: This cost may vary from the funding amount requested.
- Funding Type(s) Requested Check the box(es) that are appropriate for the project type for which you are requesting funding. If you have multiple projects, submit separate Requests for Funding for Stormwater, drinking water, and /or wastewater projects. It is recommended that you contact the Division prior to completing the Request for Funding if you have multiple projects supported by the funds appropriated in S.L. 2021-180 Sections 12.13. and 12.14.

<u>Sections 2, 3, and 4 – Recipient, Form Preparer, and Engineer Contact Information</u>

Complete this section with all pertinent information. The following bullet points contain specific information.

- Authorized Representative Name The Authorized Representative should be mayor, manager, finance director, or similar position.
- Mailing Addresses Provide the mailing address where the Recipient, Preparer, and Engineer receive mail. For example, if you have a PO Box, provide this information rather than your physical address.

Note: Zip codes may be different for PO Boxes and physical addresses. If using a PO Box to receive mail, **use the zip code for that PO Box**.

• Engineer Contact Information – If your Request for Funding Preparer is the same as the Engineer Contact, check the No box. Section 5 may then be left blank. If the answer is Yes, provide the appropriate information.

<u>Section 5 – Project Description</u>

In this section, provide a brief description of the proposed project at a broad level of detail. Include the project purpose and what the project entails (e.g., rehabilitation of 2,000 l.f. of sewer, construction of a new well). Project description must demonstrate that the project is eligible for funding considering ARP requirements, funding source limitations, and budget limitations.

Include information such as types of equipment to be included, capacity of equipment, and estimates of line length. Note: Major line items in the project budget (Section 8) must be shown in the project description. For example, if 2,000 l.f. of 4-inch, 3,000 l.f. of 6-inch, and 4,000 l.f. of 8-inch pipe are listed in the project budget, they must be listed in the project description. Include the number of new services if applicable.

<u>Section 6 – Project Budget</u>

Complete the project budget by addressing the categories provided in the table (insert rows as needed). Total the cost amount for each line and provide the total cost amount. Please note the following related to this section:

- Budget should consider potential increases in material and construction costs.
- Construction project budgets do not need to be signed or sealed by a properly licensed professional engineer.

Certification by Authorized Representative

The Authorized representative must read and initial in the space beside each question. If not applicable, use N/A.

Completeness Checklist

To better ensure that the project information is sufficient to provide the recipient with a Letter of Intent to Fund, ensure that all of the information listed in the completeness checklist is provided in the Request for Funding and initial each item on the checklist.

Submittal Information

• Delivery Method

- We recommend that Requests for Funding be delivered to the Division as soon as possible.
- If mailing, allow at least two weeks for delivery to the Mail Service Center address shown on the Request for Funding. The Division recommends certified mail. Please call the Division's offices to ensure that your package has been received.
- o If using courier delivery or hand delivering, please utilize the physical address on the Request for Funding. If using courier delivery, verify that your package has arrived.

Questions on this Form?

- For drinking water Requests for Funding: please contact Kavitha Ambikadevi, P.E., Drinking Water Project Unit Supervisor, at 919-707-9048 or email at Kavitha. Ambikadevi@ncdenr.gov.
- For wastewater and stormwater Requests for Funding: please contact Ken Pohlig, P.E., Wastewater Projects Unit Supervisor, at 919-707-9174 or email at ken.pohlig@ncdenr.gov.

5. Project Description

In July 2018, the Northeast Rowan County water system began distributing public water supply to customers who were previously supplied from private groundwater wells. Northeast Rowan County is a consecutive system that obtains water from Salisbury-Rowan Utilities (SRU) and serves a population of approximately 445 people. Rowan County owns the water system, and SRU serves as the Operator in Responsible Charge (ORC). SRU operates a water treatment plant which supplies the City and Northeast Rowan County systems. Northeast Rowan County and its ORC have performed semi-annual tap sampling for LCR compliance starting in July 2018.

The system's 90th percentile lead concentration has exceeded the Action Level during many of these sampling events with no source of lead in the public water supply, thus, the County and ORC have taken action to support the reduction of lead concentrations in homes in the system by altering treatment techniques to best prevent the leaching of lead from the private plumbing systems.

In an effort to obtain compliance and provide their customers with safe drinking water, NEWS began a corrosion study partnering with Hazen and Sawyer and Virginia Polytechnic Institute and State University. As a result of this study and under direction of NCDEQ, it was recommended that the NEWS install a chemical booster station capable of adjusting pH and adding a corrosion inhibitor at the point of entry. Since that time the chemical booster station has been designed, constructed, and placed online.

The chemical booster station includes a conditions structure containing chemical feed systems to add caustic to control pH and corrosion inhibitor to maintain a minimum concentration of phosphate. Installed chemical feed systems include feed pumps, chemical drums, containment areas, instrumentation and a 30-day supply of each chemical. Safety features include emergency shower/eyewash station, alarms for operation including overfeeding, spills, and loss of power, and fencing to prevent uncontrolled site access. A chemical injection manhole was supplied for operations and maintenance of chemical feed injection points, a pH meter and the installation of an inline mixer to ensure proper chemical dispersion into the water supply.
